PROFESSIONAL SUMMARY

Production-focused Flutter Developer with 2+ years of mobile development experience across Flutter and Native Android. Experienced in building and maintaining live Android/iOS applications using Flutter, Dart, Riverpod/BLoC, REST APIs, Firebase, WebSocket, and Feature-First Clean Architecture, with hands-on ownership of complex integrations, performance optimization, debugging, and production releases.

TECHNICAL SKILLS

- **Mobile Development:** Flutter, Dart, Android/iOS App Development, Native Android (Kotlin, Java, XML)
- **Architecture & State Management:** Feature-First Clean Architecture, SOLID Principles, Dependency Injection, Riverpod, BLoC, GetX
- **Networking, Authentication & Real-Time:** RESTful API Integration, Dio, WebSocket, Socket.IO, OAuth, JWT, Deep Linking
- **Firebase & Data:** Firebase Authentication, Cloud Firestore, Firebase Cloud Messaging (FCM), Push Notifications, Firebase Analytics, Firebase Crashlytics, Secure Storage, Hive, SQLite
- **Third-Party Integrations:** Google Maps & Places API, Agora RTC, Stripe, Payment Gateway Integration, In-App Purchases, RevenueCat, AI/LLM API Integration
- **Testing & Performance:** Unit Testing, Widget Testing, Integration Testing, Flutter DevTools, Debugging, Performance Profiling & Optimization
- **Version Control, CI/CD & Release:** Git, GitHub, GitLab, CI/CD, GitHub Actions, Codemagic, Agile/Scrum, Google Play Store Deployment, Apple App Store Deployment

PROFESSIONAL EXPERIENCE

Flutter Developer | Softvence

Aug 2025 – Present

- Lead end-to-end delivery of Flutter features across production Android/iOS apps, coordinating implementation, code reviews, and collaboration with UI/UX and backend teams.
- Build scalable modules using Flutter, Dart, Feature-First Clean Architecture, Dependency Injection, and Riverpod, BLoC, or GetX based on project requirements.
- Integrate REST APIs, WebSocket, Socket.IO, Firebase, and third-party SDKs; debug and profile production issues to improve performance, responsiveness, and reliability.
- Support CI/CD workflows, Android/iOS releases, store submissions, updates, and ongoing maintenance across 6 live apps on Google Play and the Apple App Store.

Freelance Android Developer | Independent Client Projects
Mar 2024 – Jun 2025

- Built and delivered Native Android client applications using Kotlin/Java, REST APIs, local storage, and third-party integrations, handling feature development, API integration, debugging, and release-ready builds.

SELECTED LIVE PRODUCTION APPS

Go Get A Genie — AI Project & Task Management App | Play Store

- Owned end-to-end Flutter delivery of project/task workflows, nested subtasks, collaboration, AI-powered ASK/CREATE features, subscriptions, push notifications, and secure sessions using Riverpod, REST APIs, AI/LLM APIs, FCM, and RevenueCat.

Rescue Transit — Animal Rescue & Transport Coordination App | Play Store | App Store

- Implemented **60+ production screens and 100+ RESTful APIs** across four role-based workflows, delivering adoption/foster, transport coordination, real-time messaging, AI chat, payments, push notifications, and Maps features using BLoC, Firebase, Google Maps/Places, and Stripe.

Karoot — Pet Care & Grooming Marketplace | Play Store | App Store

- Developed buyer and groomer marketplace workflows covering discovery, scheduling, bookings, KYC, and service lifecycle management, integrating REST APIs, Riverpod, Socket.IO, FCM, Stripe payments, and Stripe Connect onboarding/payouts.

Deep Quran — Islamic Learning & Quran Reading App | Play Store | App Store

- Owned approximately **60% of the Flutter implementation**, delivering Quran reading, audio, translations, QCF Mushaf, memorization, and gamified learning with GetX, REST APIs, Firebase Authentication, FCM, just_audio, In-App Purchases, and Xendit.

OPEN SOURCE

curved_app_bar — Flutter Package | pub.dev | GitHub

- Published a reusable Flutter package for customizable curved AppBars with flexible styling, navigation controls, and a state-management-independent API for **Scaffold.appBar**.

EDUCATION

Bachelor of Science in Computer Science and Engineering
Uttara University, Dhaka | 2025 - Present
Diploma in Engineering (Computer Technology)
Kurigram Polytechnic Institute, Kurigram | 2020 - 2024 | CGPA: 3.65/4.00
